PRODUCTS IN YOUR HOME MAY CONTAIN TOXIC CHEMICALS

Ingredients in leading household brands can cause health risks

DID YOU KNOW?

Over 80,000 chemicals have been on the market and available for use since the Toxic Substances Control Act (TSCA) was enacted in 1976. Of those, only a very small percentage are regulated or tested for safety and leading third party research directly links many of these chemicals to serious health risks.*

IS YOUR HOME SAFE? FIND OUT AT TakeTheToxicTest.com/

*Each health risk has been sourced from a verified, third-party resource. Please refer to TakeTheToxicTest.com for specific sources.
